Summary

Computer Science undergraduate with experience in building secure, scalable, and data-driven software applications. Hands-on experience in building and integrating secure authentication systems, REST APIs, and scalable backend architectures. Seeking opportunities to design, build, and maintain scalable, production-ready software systems.

Education

Brainware University

B.Tech in Computer Science and Engineering (AI & ML), **CGPA: 8.9**

2022 – 2026

Kolkata, West Bengal

Kendriya Vidyalaya (CBSE)

Senior Secondary Examination, **Percentage: 81**

2021

Siliguri, West Bengal

Experience

YBI Foundation

Internship in Artificial Intelligence & Generative AI

Nov. 2025 – Dec. 2025

Kolkata, West Bengal

- Developed a natural language to SQL system enabling **non-technical users** to query relational databases, supporting **100+ test queries**.
- Analyzed schemas and relationships across **10+ structured datasets**, improving SQL generation accuracy.
- Enhanced SQL output reliability through prompt engineering, improving query correctness by **25%**.

Projects

V-Tube – Video Streaming Platform | React.js, Node.js, Express.js, MongoDB

Oct. 2025 – Dec. 2025

- Architected a scalable video sharing platform supporting **user authentication and role-based access** for multiple users.
- Integrated **JWT-based authentication** with protected routes across **10+ backend API endpoints**.
- Engineered and consumed **RESTful APIs** for video uploads, likes, comments, playlists, and subscriptions.
- Applied modular backend architecture and responsive UI principles to support maintainability and future scalability.

Creative Showcase – Image Gallery Platform | React.js, Node.js, MongoDB

Dec. 2025

- Created a secure **image gallery** platform enabling user-specific media uploads and personalized dashboards.
- Integrated backend APIs to manage media data and enforce access control for authenticated users.
- Designed a responsive frontend with a **dynamic masonry layout** to improve user experience and usability.

Smart TODO API – Task Management Backend | Node.js, Express.js, MongoDB

Sep. 2025 – Oct. 2025

- Built **RESTful APIs** to manage user-specific tasks, supporting CRUD operations for authenticated users.
- Secured **8+ API endpoints** using **JWT-based authentication** and authorization checks.
- Established validation and centralized error-handling to ensure data consistency and reliable API responses.

Skills

Languages: C++, Python, HTML, CSS, JavaScript, SQL

Frameworks & Libraries: React.js, Node.js, Express.js

Databases: MongoDB, MySQL

Developer Tools: GitHub, VS Code, Postman

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Time Management, Adaptability
